

Full Gigabit Greatly Reliable

Powered by PSE / One-key CCTV / 6KV Surge Protection

UTP3-GSW04-TPD60

1 Full Gigabit Downlinks

Stable transmission of four 5-megapixel cameras; 2 Gigabit uplink ports meet the needs of HD security cameras, local NVR storage, managed switch, and the outside network devices.

2 One-key CCTV Mode

VLAN function realizes the communication isolation among four downlink ports, ensures a higher forwarding efficiency and securer system. auto-identifies and narrows network storm to 2M or lower, maintains safe network.

3 Security-exclusive More Stable

Super lightning protection & anti-interference design ensure a stable and reliable operation environment for devices under weak wells or complicated security projects.

4 IEEE802.3af/at Standard

1~4 Gigabit downlink PoE ports support 802.3af/at. PoE output power of single port is up to 30W. Satisfy the power requirements of most PoE cameras or other PDs. Handle fully loaded PoE cameras successfully.

5 Powered by PSE(PD Feature)

The fifth port is powered by PSE and provides power for four downlink ports (60W); free of power adapter & simplify power supply; play a role of Ethernet extender.
