

Work with PSEs; 60Mbps bi-direction data via coax; Up to 300 meters distance; Work with extension solutions of most network media;

300m

Operate in Wide-range Temperature
Level 3 ESD & Surge Protection;
Operation Temperature: -10 ℃~ + 55 ℃;

Real-time & Stable video data

Data delay ≤20us; Bi-direction data; Real-time video surveillance;

Easy & Flexible Installation

Slip-resistant sawtooth groove is good for one-handed grip; Take cables in slot between the splicing units to simplify the cabling andmaintenance; Multiple installation design fit easily in many locations;

Wall-mounting

Splicing

Adsorption

Cost-effective Choice

Four-layer PCB features of better dielectric characteristics; Independent surge protection circuit ensures high ESD; Heat resistant ABS made shell adopts unibody design;
