

Release Note for Vigor2110 Series

Firmware Version: 3.2.1
Date: September 22, 2008
Applied Models:
Vigor2110, Vigor2110n

Vigor2110 series is a broadband router. It integrates IP layer QoS, and NAT session/bandwidth management to help users control works well with large bandwidth. By adopting hardware-based VPN platform and hardware encryption of AES/DES/3DES, the router increases the performance of VPN greatly and offers several protocols (such as IPSec/PPTP/L2TP) with up to 2 VPN tunnels.

The object-based design used in SPI (Stateful Packet Inspection) firewall allows users to set firewall policy with ease. The CSM feature allows more precise and efficient access control for URL / Web Content Filtering, and IM/P2P applications.

By the way, DoS/DDoS prevention and URL/Web content filter strengthen the security outside and control inside. Object-based firewall is flexible and allows your network be safe.

In addition, Vigor2110 series supports USB interface for connecting a USB printer for sharing paper printing. Vigor2110 series provides two-level management to simplify the configuration of network connection. The “user mode” allows user accessing into WEB interface via simple configuration. However, if users want to have advanced configurations, they can access into WEB interface through the “admin mode”.
