

Release Note for Vigor2765 Series

| | |
|-------------------|--|
| Firmware Version: | 4.0.5.2 |
| Release Type: | Normal |
| Applied Models: | Vigor2765, Vigor2765ac, Vigor2765Vac (for tender case) |

Vigor2765 is a VDSL2 35b router which is suitable for speed-wanted customers. With high throughput performance and secured broadband connectivity provided by Vigor2765, you can simultaneously engage these bandwidth-intensive applications, such as high-definition multimedia content, online music, movie streaming and file sharing.

New Features

- None.

Improvement

- Improved: Adjust router's self-signed certificate to comply with new browser restrictions. Start on 2020-09-01, many client OSes/browsers will enforce publicly trusted TLS server certificate lifetime to 398 days or less, and connections will be rejected if the certificates violated this rule, so this firmware patch will automatically re-sign all the self-signed certificates lifetime to 395 days (was 2 years or longer in older versions).

Known Issue

- None.

Notes

- Vigor2765ac only supports WDS in wireless 5G.
