

## Release Note for VigorAP 802

Firmware Version:	1.3.2
Release Type:	Normal
Applied Models:	VigorAP 802

VigorAP 802, a 11ac dual-band wall plug AP, can be used to bridge any Ethernet device to a network. It is not necessary for you to spend time and money installing expensive Ethernet cable to share your Internet connection or HD / SD video stream at home. Just plug VigorAP 802 to the power outlet on the wall. You can get stable and fast speed for data transmission at any site in your house.

### New Features

- Support Device Object, Mesh VLAN, Advanced Configuration Sync and Station List.

### Improvement

- Improved: Add the wireless signal of MESH ROOT in MESH Status of MESH NODE.
- Corrected: Uplink LED still remained on after mesh synchronization.
- Corrected: The Dashboard displayed incorrect signal status if Range Extender was chosen as the connection mode.
- Corrected: Due to the data exchange problem, a mobile device could not get DHCP IP a period of time when disconnecting from router's SSID and reconnecting to VigorAP's SSID.

### Known Issue

- None.

### Notes

- None.
