

Release Note for VigorAP 802

Firmware Version:	1.3.3
Release Type:	Normal
Applied Models:	VigorAP 802

VigorAP 802, a 11ac dual-band wall plug AP, can be used to bridge any Ethernet device to a network. It is not necessary for you to spend time and money installing expensive Ethernet cable to share your Internet connection or HD / SD video stream at home. Just plug VigorAP 802 to the power outlet on the wall. You can get stable and fast speed for data transmission at any site in your house.

New Features

- Support connection with different channels under Range Extender mode.

Improvement

- Improved: Make slight changes to meet the simplified APM on the Vigor router.
- Corrected: The issue of mesh node management by VigorACS server.
- Corrected: The issue of deleting individual MAC address from the Access Control.

Known Issue

- None.

Notes

- None.
