

Release Note for VigorAP 912C

Firmware Version:	1.4.8
Release Type:	Normal - Upgrade when convenient
Applied Models:	VigorAP 912C

VigorAP 912C is a ceiling-mount Wi-Fi for business networks. It has a capacity of up to 256 concurrent active users, ideal for a high-density environment such as a BYOD workplace. The low-profile appearance and PoE power supply provide the flexibility in deployment.

New Features

- Add the new feature of event alert (Diagnostics>>Alert Event).

Improvement

- Improved: Unify the 802.11r Mobility Domain Identifier value to make 802.11r roaming work between AP912C and AP903.
- Corrected: An issue with connecting to other AP 912C via the range extender mode.

Known Issue

- None.
