

Release Note for VigorLTE 200 Series

Firmware Version:	3.9.1
Release Type:	Normal
Applied Models:	VigorLTE 200 / VigorLTE 200n

VigorLTE 200 Series is a single WAN router with two WAN interfaces, including main LTE WAN and selectable Ethernet WAN. It offers features including VPN, Firewall, Content Filtering, and central management solution for Vigor access points.

New Features

- Note.

Improvement

- Improved: Adjust router's self-signed certificate to comply with new browser restrictions. Start on 2020-09-01, many client OSes/browsers will enforce publicly trusted TLS server certificate lifetime to 398 days or less, and connections will be rejected if the certificates violated this rule, so this firmware patch will automatically re-sign all the self-signed certificates lifetime to 395 days (was 2 years or longer in older versions).
- Corrected: A display issue of dashboard.

Known Issue

- None.

Notes

- None.
