Release Note for VigorLTE 200 Series

Firmware Version:	3.9.8.3
Release Type:	Normal
Applied Models:	VigorLTE 200n

VigorLTE 200 Series is a single WAN router with two WAN interfaces, including main LTE WAN and selectable Ethernet WAN. It offers features including VPN, Firewall, Content Filtering, and central management solution for Vigor access points.

New Features

- None.

Improvement

- Improved: Add UK APN into the pre-configured APN list.
- Improved: Support LTE Network Scan function on LTE EC25 module.
- Corrected: An issue with failure to export the "opvn.cfg" when WAN was set as LTE.
- Corrected: An issue with some IPsec options were missing for Vietnam country code.
- Corrected: An issue with unexpected router reboots when LTE module L811 failed to detect a good signal.
- Corrected: An issue that the self-signed certificate was not regenerated automatically when the router set a daily schedule reboot.
- Corrected: An issue with the configured LTE setting didn't take effect if restarting LTE by the "wan lte set power_recycle" CLI command.

Known Issue

- None.

Notes

- None.
