

## Release Note for VigorConnect

Software Version:	1.2.0
Release Type:	Normal
Applied System:	Windows 7, 8, 10
Applied Models:	All VigorAPs (AP700, AP800, AP900 not included) VigorSwitch P2500/G2500, P2280/G2280, P2280x/G2280x, P2121, P1280/G1280

VigorConnect is a software which provides centralized AP management and switch management for TR-069 based devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

### New Features

- Support the management for VigorSwitch (e.g., VigorSwitch P2500/G2500).
  - Add VLAN Settings, PoE configuration and Topology Overview setting.

### Improvement

- Improved: Support the function of auto detect router name.
- Improved: Change the file naming rule of the backup cfg.
- Improved: The "Add" button will appear only when new devices detected and displayed on New Devices list.
- Improved: Improvement for the Wireless wizard.
  - Add VLAN tag configuration for guests and main SSID on Wireless Wizard.
  - Add Station Control.
- Improved: Improvement for the AP Profile.
  - Add Quick Mode on Profile Setting (on NETWORK MENU >> Configuration >> AP Profile>>Profile Setting).
  - Add TR-069 STUN server settings
  - Add Mesh Mode.
  - Add WLAN 5G2 setting.

## Known Issue

- None.
