

Release Note for VigorConnect

Software Version:	1.9.1
Release Type:	Normal - Upgrade recommended when convenient
Applied System:	Windows 7, 8, 10, 11 / Linux / Raspberry Pi / Docker / Arm64Docker
Applied Models:	All VigorAPs and VigorSwitches. Refer to Compatible Devices at https://www.draytek.com/products/vigorconnect/

VigorConnect is a local network management software that provides centralized AP/switch management for LAN devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

New Features

- Support to restore the default password for the root user.
- VigorConnect can be downloaded in a new compressed file format type, ".7z".

Improvement

- Improved: Improve the connection stability between the VigorSwitch and VigorConnect.
- Corrected: An issue with no time series chart displayed on the Dashboard>>System Information.

Known Issue

- An issue that viewing Flow with FireFox (HTTPS) would block illegal HTTPS certificate issued by Grafana.
