Release Note for VigorConnect

Software Version:	1.9.3
Release Type:	Regular – Upgrade recommended when convenient, as it includes general improvements and optimizations
Applied System:	Windows 7, 8, 10, 11 / Linux / Raspberry Pi / Docker / Arm64Docker
Applied Models:	All VigorAPs and VigorSwitches. Refer to Compatible Devices at https://www.draytek.com/products/vigorconnect/

VigorConnect is a local network management software that provides centralized AP/switch management for LAN devices. VigorConnect has device status, monitor status of devices, or perform scheduling tasks such as firmware upgrade, configuration backup/restore and parameter profile for mass deployment of the managed devices.

New Features

- None.

Improvement

- Improved: Change the default value for AP Profile as "As Parent".
- Improved: VigorAP will not be reboot after configuring the AP Profiles.
- Improved: Change the selections for Total Upload and Total Download using drop-down menu for AP Profiles.
- Corrected: An issue with failure to configure MAC ACL properly on 5GHz band (VigorAP 906 and VigorAP 903).
- Corrected: An issue with failure to configure switch time settings on VigorConnect >> Configuration >> PoE >> Schedule >> Edit >>How Often.

Known Issue

- An issue that viewing Flow with FireFox (HTTPS) would block illegal HTTPS certificate issued by Grafana.
